CENTRAL DIRECTORATE FOR  
TRADE COMMUNITY AFFAIRS**

The Esteemed Embassy of Turkey  
Greetings,

In light of the state's current efforts for the digital transformation, the national Nafeza system for Egyptian cross-border trade (Nafeza) is one of its most important projects, based on the application of the "electronic data" and "electronic signature" method as a basis for securing the process of customers entering the electronic portal to include data and submit shipment documents after signing them electronically.

Where the Decision of the Minister of Finance No. (38) for the year 2021 was issued regarding the mechanism of the pre-registration system of shipments, which includes the pre-registration of shipments (ACI) of the received shipments at seaports and airports, which is binding by this system in accordance with the conditions and procedures contained in the aforementioned ministerial decision. As well as the Ministerial Decision No. (222) for the year 2021, provided that the goods will not be allowed to be unloaded in the case that the reference number is not included in accordance with the pre-registration system, with the goods being re-shipped outside the country at the expense of the carrier or his representative.

Therefore, and in order to your Esteemed company to continue to deal with the National Trade System in accordance with the pre-registration system for shipments, kindly start taking the necessary measures to start dealing according to the aforementioned system, according to the following:

- Creating an account for the company on the electronic portal of the (Nafeza) system;
- Obtaining an electronic signature certificate;
- The Egyptian importer or his representative of customs clearing agents to start the pre-registration of shipments (ACI);
- The foreign exporter or the producer sending the shipment data and documents electronically on which the shipment identification number is installed (ACID), to (Nafeza) platform through the secured Blockchain platform which is approved by the concerned authorities;
- The importer or his representative of the customs clearing agents approves the shipment documents using the electronic signature by entering (Nafeza) platform and seeing the shipment file with the identification number (ACID), and the importer or his representative of the customs clearing agents may proceed with the customs procedures with the "pre-clearance" system through (Nafeza) platform in case he wants to;
- The rest of the procedures for releasing the shipment are completed through (Nafeza) platform in accordance with the provisions of the aforementioned customs law.

For more information about the system, please visit the website "Nafeza"
